Unit 2

The environmental problem of plastics

Introduction

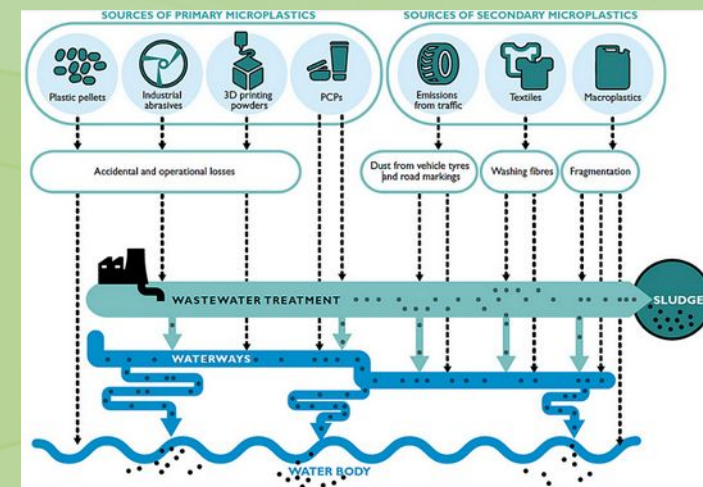

From the many global issues that human beings have caused during the Anthropocene era, plastic pollution has become one of the most pressing environmental issues, as rapidly increasing production of disposable plastic products overwhelms the world's ability to process them as waste.

Work in group

Develop a search in Internet and produce a presentation about plastics. Each group will address one of the following topics.

- History of plastics
- Diverse types of plastics and their use
- Facts about plastic pollution
- Targeted solutions for plastic pollution
