Introduction

On behalf of the Ministry of Foreign Affairs, the Mexican Agency for International Development Cooperation (AMEXCID) invites foreign citizens who are interested in studying for a specialization, master's degree or doctorate, conducting graduate-level research, or taking part in an undergraduate or graduate-level academic mobility program in Mexico, to participate in the **2017 Mexican Government Scholarship Program for International Students.**

The scholarships are offered to more than 180 countries through a series of bilateral conventions, multilateral programs and special agreements. More than 90 Mexican institutions of higher education (IES) participate and all offer academic programs registered with the National Council for Science and Technology (CONACYT) in the National Program of Quality Graduate Degrees. These programs demonstrate the progress made by Mexico in various areas of the sciences and humanities.

By offering Mexican government scholarships for international students, Mexico strengthens its role as an actor with global responsibility and renews its commitment to cooperation programs that help create highly skilled human capital. The presence in Mexico of international students, academics and scientists helps build permanent bridges of dialogue that enrich the long-term foreign policy agenda through contributions of exceptional value for the country and for its partners abroad. In addition, the Mexican institutions and the academic community benefit from the increased internationalization.

Thank you for choosing Mexico as your educational destination!
